Personal Projects

Twitter 2.0 🐙 ↗

- Twitter-2.0 created using **React, Redux-Toolkit, TailwindCSS** and hosted on **Firebase**
- Used **React-Routers** to enable fluent loading of pages and **TailwindCSS** for user-friendly and responsive front-end design.

Password Manager 🐙 ↗

- Password Manager is a fullstack **MERN App** which keeps track of all your credentials
- Designed & developed a Web App with back-end on **Nodejs, Express & MongoDB** and front-end using **React** and **ContextAPI + useReducer**.

Shareme 🐙 ↗

- Developed a **Shareme** application inspired by **pinterest** with **React, Redux, TailwindCSS, Sanity** and **Firebase**.
- Enabled **Google-Authentication** to give a personalized user experience.

Whatsapp+ 🐙 ↗

- Made a chat based application with UI similar to WhatsApp using **React.js** front-end and back-end on **Google Firebase**.
- Utilized React-context-API to access logged-in user's information easily.

and many more ...
